Editor in Chief

Prof. Dr. Flacico Canavero

Word of the editor

TPL is an open access international journal which covers the recent trends of theoretical, experimental and observational physics. This aims to provide a great opportunity to the lead researchers worldwide for publishing their valuable works at minimum honorarium. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest. Because I believe that great ideas are priceless.

IMPACT FACTOR 3.012

Author Benefits

Open Access Unlimited and free access for readers

No Copyright Constraints Retain copyright of your work and free use of your article

Thorough Peer-Review Coverage by Leading Indexing Services SCIE-Science Citation Index

No Space Constraints, No Extra Space or Color Charges
No restriction on the length of the papers, number of figures or colors

Impact Factor 3.012(2020 Journal Citation Reports®)

Rapid Publication Manuscripts are peer-reviewed and a first decision provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 8-10 days (median values for papers published in this journal in the first half of the respective year).

Scope of journal

TPL (ISSN 6987-6980) is an international, peer-reviewed, open access journal on the physics and its applications. It publishes reviews, research articles, short communications and letters. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

Themes covered currently

- Applied Physics
- Atomic Physics
- Biophysics
- Cluster Physics
- Complex Systems Physics
- Computational Physics
- Condensed Matter Physics
- Cosmology & Early Universe
- Earth & Planetary Sciences
- Fluid Physics
- Free-Electron Laser
- General Physics
- General Relativity
- High Energy Astrophysics
- Instrumentation & Measurement
- Interdisciplinary Physics
- Laser & Photonics
- Low Temperature Physics
- Medical Physics
- Materials Sciences & Technology
- Mathematical Physics
- Mechanical Response of Solids & Structure
- Molecular Physics
- Nano-science
- New Materials: Micro & Nano-Mechanics & Homogeneization
- Non-Equilibrium Thermodynamics
- Nonlinear Science
- Nanotechnology
- Nuclear Science & Engineering
- Optical Physics
- Physical Engineering
- Physics of Nanostructures
- Plasma Physics
- Quantum Mechanical Developments
- Quantum Theory
- Relativistic Astrophysics
- Solar Energy
- Statistical Physics
- Statistical Mechanics
- Theoretical High Energy Physics
- Thin films Physics
- Transport Theory
- X-Ray Diffraction
- X-Ray Spectroscopy

Basic science research

- Theoretical and applied physics.
- Mathematics.
- Chemistry.
- Experimental science.
- Nanotechnology.
- Nanoscale device modelling and fabrication.
- Growth and fabrication techniques for nanostructures and nanodevices.
- Nanofabrication and Processing of nanoscale materials and devices
- Synthesis and Self-Assembly of Nanostructured Materials and Films
- Nanoscale characterizations and properties of nanomaterials and nanoelectronics

- Nanosystems for Biological, Medical, Chemical, Catalytic, Energy and Environmental Applications
- Nanophotonics and Nanoplasmonics Materials and Devices
- Application of Nanostructured materials and Nanodevices
- VLSI design and Integrated circuit fabrication
- Material science.
- Nuclear science.
- Space science.
